### 16 Day Sri Lankan Wildlife, History & Culture

Ex Colombo - Colombo  
25 March - 9 April 2019

*Highlights: Historic Sigiriya & Polonnaruwa, Yala & Bundala National Parks & Sinharaja Rainforest, Whale watching at Mirissa*

Off the southern coast of India, the enchanting island of Sri Lanka is beautiful, boasting an abundance of exotic, natural riches. Sri Lanka's ancient Buddhist traditions, teaching compassion for all living creatures, have paved the way for the country's long history of conservation.

The island abounds with magnificent scenery and historic fortresses, temples and monasteries. Throughout your tour you will explore both the natural wonders and the island's fascinating culture and history.

Sri Lanka's wildlife is varied, including 86 mammal species, 16 of which are endemic to the island. Sri Lanka is home to several wild elephant herds, leopards, sloth bears, mouse deer and many monkey species. The birdlife and butterflies are colourful and plentiful. The island is home to over 400 recorded bird species, 33 of these are endemic.

Enjoy some of Sri Lanka's best primate watching among the ancient ruins of Polonnaruwa with toque macaques, leaf monkeys and grey langurs at close range.

We will search for the illusive leopard in Yalla National Park, which is home to the world's highest concentration of this exquisite cat along with Asiatic buffalo, jackal and wild boar.

A day of whale watching off the coast at Mirissa will be one of the highlights of your tour. Blue and Sperm Whales plus pods of dolphins are regularly seen in these waters.

For those interested in botany, Sri Lanka is a land of plenty. The island features diverse habitats, including wet zone tropical forests and shrub lands. In the hills, vegetation varies from almost treeless pantanas (plains) to dark rhododendron forests.

The tour will be led by Coates Wildlife Tours Managing Director, Tom Grove, and Saman Veediyabandara, one of Sri Lanka's leading birding/naturalist guides.
